

Broxton E. Ashburn, PE

Broxton (Brock) Ashburn is a civil engineer registered in both North and South Carolina, having graduated from University of North Carolina at Charlotte in 1992. Brock is also a licensed general contractor in residential and commercial construction. A majority of Brocks engineering experience has dealt with design of drainage systems for roadways, erosion control plans, site plans, hydrologic and hydraulic (H&H) studies of both urban and rural watersheds, surveying and data collection for H&H studies, stream stabilization for both rural and urban streams, soil analyses, foundation engineering, and design/build applications dealing with all aspects of construction. Most construction activity has been residential in nature with some light commercial. Having grown up in and around the Mitchell River, Brock has a high interest in using whatever experience is necessary to preserve Surry County's precious resources.
