

Kids Voting Surry County

Kids Voting-Surry County is a local nonprofit, nonpartisan civic education organization that prepares young people be educated, engaged citizens.

Our goal is to empower young people to participate in our democracy and let their voices be heard. By participating in Kids Voting, students learn about government, democracy, voting, and the rights and responsibilities of citizenship. The program creates an expectation that they will become lifelong, informed voters at age 18.

Today's students will one day become the leaders of our communities and nation. What, and how, they learn is critical to the vitality of America's democracy and economy of the 21st century. Together, let's prepare them in the most effective way possible.

Our program is made possible through partnerships with local businesses.

We hope you will join us in thanking these businesses for the investment they are making in our community's future.
